

BATTERYstart PRO 1000

The OSRAM BATTERYstart PRO 1000 is a safe and compact Lithium-ion Cobalt (LiCoO₂) jump starter for professional workshops. Designed for multiple uses, it will jump start all petrol engine vehicles and up to 10L diesel engine vehicles. Much smaller in size compared traditional Lead Acid starters, the BATTERYstart PRO 1000 is 75% lighter than traditional Lead Acid jumpstarters, yet still delivers high performance power safely. It includes intelligent safety clamps to manage power between the jump starter and vehicle, maintaining user safety with reverse polarity, short circuit and anti-spike protection. The hard-wearing, robust polycarbonate construction makes the BATTERYstart PRO 1000 ideal for workshop environments. The unit can be recharged quickly via a PD60W charger (not supplied with the unit).
